CON-E-CO Introduces LO-PRO 427CM Central Mix Batch Plant

High output mobile central batch plant offers increased productivity.

Blair, Neb. (Jan. 3, 2011) – CON-E-CO, an Oshkosh Corporation (NYSE:OSK) company, today introduced the LO-PRO® 427CM Central Mix (CM) batch plant. This high output unit is available with a new 48-inch wide mixer charging belt. When combined with a CON-E-CO tilt mixer, the plant can achieve production of up to 350 cubic yards per hour. A LO-PRO 427CM model, courtesy of Cooper Engineering of Corona, Calif., will be on display at the World of Concrete Expo that begins on January 18th in Las Vegas, Nev.

“The LO-PRO batch plant continues to set the industry benchmark for productivity, flexibility and reliability,” said Neil Smith, CON-E-CO general manager. “The addition of the 427CM will allow us to offer customers increased production and excellent quality for the most demanding projects. With well over 1,000 units sold, the LO-PRO is our most popular line for good reason. From its patented batcher to low profile design, the LO-PRO is easy to configure, set up, operate and access.”

Like all LO-PRO models, the 427CM batch plant is engineered to easily accept optional bolt-on expansion modules, making the plant easy to grow as the customer’s production needs increase. Additional features on the 427CM include:

- Patented LO-PRO “blending” cement batcher for enhanced product quality
- Configurable for either dump truck or transit mixer truck charging
- Optional self-erecting plant and mixer for charging either dump trucks or transit mixer trucks
- Standard 50 cubic yard aggregate storage bin, with a low 14-ft aggregate charging height, or optional 70 or 90 cubic yard aggregate storage bin
- Standard 427-barrel single compartment in-truss silo and available 409-barrel two compartment in-truss silo

- “Live Bottom” aggregate batcher for smoother operation
- Additional 400-, 565- or 735-barrel cement storage component that mounts directly on the plant
- Overhead truck dust collection system allows for recycling material directly back in to the cement batcher

“Our customers need to set up quickly and easily, and this is another area where the LO-PRO excels. The unitized structural design require no on-site welding, and all plumbing and wiring are factory installed and tested,” added Smith. “That’s why the LO-PRO is able to quickly add to the bottom line.”

About CON-E-CO

Concrete Equipment Company (CON-E-CO) is a subsidiary of Oshkosh Corporation [NYSE: OSK], and engineers, manufactures and supports North America’s leading line of portable and stationary batch plants. CON-E-CO products have a well-earned reputation for quality, durability and reliability. Around the globe, CON-E-CO batch plants are operating in five continents. Forward-Looking Statements

This press release contains statements that the Company believes to be “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact, including, without limitation, statements regarding the Company’s future financial position, business strategy, targets, projected sales, costs, earnings, capital expenditures, debt levels and cash flows, and plans and objectives of management for future operations, are forward-looking statements. When used in this press release, words such as “may,” “will,” “expect,” “intend,” “estimate,” “anticipate,” “believe,” “should,” “project” or “plan” or the negative thereof or variations thereon or similar terminology are generally intended to identify forward-looking statements. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties, assumptions and other factors, some of which are beyond the Company’s control, which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. These factors include the impact on revenues and margins of the projected decrease in M-ATV production rates; the cyclical nature of the Company’s access equipment, commercial and fire & emergency markets, especially during periods of global economic weakness and tight credit markets; the Company’s ability to produce vehicles under the FMTV contract at targeted margins;

the duration of the ongoing global economic weakness, which could lead to additional impairment charges related to many of the Company's intangible assets and/or a slower recovery in the Company's cyclical businesses than equity market expectations; the expected level and timing of U.S. Department of Defense (DoD) procurement of products and services and funding thereof; risks related to reductions in government expenditures in light of U.S. defense budget pressures and an uncertain DoD tactical wheeled vehicle strategy; the potential for the U.S. government to competitively bid the Company's Army and Marine Corps contracts; the consequences of financial leverage associated with the JLG acquisition, which could limit the Company's ability to pursue various opportunities; the potential for commodity and other raw material costs to rise sharply, particularly in a future economic recovery; risks related to the collectability of receivables, particularly for those businesses with exposure to construction markets; the cost of any warranty campaigns related to the Company's products; risks related to costs and charges as a result of facilities consolidation and alignment; risks related to production delays arising from supplier quality or production issues; risks associated with international operations and sales, including foreign currency fluctuations and compliance with the Foreign Corrupt Practices Act; risks related to work stoppages and other labor matters; the potential for disruptions or cost overruns in the Company's global enterprise system implementation; the potential for increased costs relating to compliance with changes in laws and regulations; and risks related to disruptions in the Company's distribution networks. Additional information concerning these and other factors is contained in the Company's filings with the Securities and Exchange Commission. All forward-looking statements speak only as of the date of this press release. The Company assumes no obligation, and disclaims any obligation, to update information contained in this press release. Investors should be aware that the Company may not update such information until the Company's next quarterly earnings conference call, if at all.
